The BIGELOW Foundation

October 20, 1993

Dr. Eugene F. Mallove
Starbound Engineering & Energy Consulting
171 Woodhill-Hooksett Road
Bow, New Hampshire 03304

Dear Dr. Mallove,

Thank you for your recent correspondence. Your detailed letter regarding the recent developments in cold fusion research and its practical applications was very interesting. However, please understand, that for the following reasons, the Bigelow Foundation must decline your invitation to participate in your project:

1. The Foundation is not a money-making venture;

2. Your projects are outside the areas of inquiry of the Foundation;

3. Currently, all of the Foundation's resources are fully focused on ongoing projects.

We wish you well in your search for sponsors in this potentially profound area of study.

Sincerely,
THE BIGELOW FOUNDATION

Angela Thompson

July 13, 1994

Mr. Robert Bigelow
The BIGELOW Foundation
4640 S. Eastern
Las Vegas, Nevada 89119

Dear Mr. Bigelow:

It is possible that you have indirectly heard of me and CSAR, but in case you have not, I enclose a brochure on CSAR. Basically, I am a sociologist of science concerned with the adjudication of unusual science claims, including those of ufology and parapsychology.

I understand that you are supporting some research in both ufology and parapsychology. I would hope to interest you in some of the work I and colleagues have been doing. On the assumption that your own goals may converge with mine, I thought it might be useful for me to contact you and try to explore and communicate about such possibilities.

Although I know something of the work you have been supporting, I particularly would like to know more about the goals of your foundation. Since I know many people who have been in touch with you, you might check with some of them (e.g., Dean Radin, John Alexander, Scott Jones, etc.) about me and CSAR.

I hope to hear from you or a representative of your foundation.

Sincerely,

Marcello Truzzi

Marcello Truzzi
Professor of Sociology

P.S. The quickest address for me (especially this summer) is my home at: 5010 Willis Road; Grass Lake, MI 49240. Telephone: (517) 522-3551; FAX: (517) 522-3555.

Department of Sociology

National Institute for Discovery Science

Research Management (Multiple Positions)

The National Institute for Discovery Science, a private research organization, is looking for senior managers for long-term employment. NIDS will explore cutting-edge issues related to the nature and evolution of consciousness and life in the universe. Managers must be capable of employing accepted scientific methods to novel or unconventional observations or theories while maintaining the highest ethical and quality standards. Successful candidates will have a doctoral degree and substantial experience managing complex research projects. Work will be reviewed and approved by a world-class science advisory board. A history of successful publication is a plus. Please send resume/CV to: **National Institute for Discovery Science, Dept. S, 4640 So. Eastern, Las Vegas, NV 89119**

GLOBAL CAREER OPPORTUNITIES

THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY

DEPARTMENT OF BIOCHEMISTRY
Senior Lecturer (Associate Professor)/ Lecturer (Assistant Professor) (1996/97 or 1997/98 Academic Year)

Outstanding candidates with a Ph.D. degree and research interests in Cellular Signal Transduction and related areas are sought. Appointment will be at Lecturer level, but exceptionally qualified candidates will be considered for appointment at Senior Lecturer level. Salary scales per annum are as follows: Senior Lecturer/Associate Professor (US$90,500-US$121,500) and Lecturer/Assistant Professor (US$58,200-US$97,300). Generous fringe benefits including medical and dental benefits, annual leave, and children's education allowances are provided; housing benefits and air passages will also be provided where applicable. Initial appointment will be on a three-year contract; a gratuity of an amount equal to 25% of the total basic salary drawn will be payable upon successful completion of contract; re-appointment will be subject to mutual agreement.

Applications/nominations should be sent with a curriculum vitae, together with the names and addresses of three referees, to Professor Tian Yow TSONG, Chairman of Search Committee, Department of Biochemistry, The Hong Kong University of Science and Technology, Clear Water Bay, Kowloon, Hong Kong (Fax No.: +852 2358-1552). The search will continue until suitable appointments have been made.

NATIONAL UNIVERSITY OF SINGAPORE
COMPUTATIONAL SCIENCE PROGRAMME

Applications are invited for Faculty positions/appointments under the Computational Science Programme from candidates who possess a PhD degree or its equivalent in any of the following areas:

Geometric Modelling	**Computational Fluid Dynamics**
Parallel Computation	**Quantum Chemistry**
Symbolic Computing	**Complex Systems**
Nonlinear Dynamics	**Neural Computing**

Duties include teaching, research and some administrative work.

Besides appointments on normal 3-year contracts, **visiting appointments** for one or two years will also be considered.

The Computational Science Programme, consisting of Computational Chemistry, Computational Mathematics and Computational Physics, is an interdisciplinary undergraduate programme in the Faculty of Science. There are eight faculties in the National University of Singapore with a current student enrollment of some 17,500. All departments are well-equipped with a wide range of facilities for teaching and research.

Gross annual emoluments range as follows:

Lecturer	S$ 56,920 - 72,580
Senior Lecturer	S$ 66,320 - 129,600
Associate Professor	S$114,870 - 159,760

(US$1.00 = S$1.41 approximately)

The commencing salary will depend on the candidate's qualifications, experience and the level of appointment offered. In addition, a 13th month Annual Allowance (of one month's salary) and an Annual Variable Component (of normally 2 months' salary) may be payable at year end, under the flexible wage system, to staff on normal contracts.

Leave and medical benefits will be provided. Depending on the type of contract offered, other benefits may include: provident fund benefits or an end-of-contract gratuity, a settling-in allowance, subsidised housing, education allowance for up to three children subject to a maximum of S$16,425 per annum per child, passage assistance and baggage allowance for the transportation of personal effects to Singapore. Staff members may undertake consultation work, subject to the approval of the University, and retain consultation fees up to a maximum of 60% of their gross annual emoluments in a calendar year.

All academic staff will be given a networked personal computer (Pentium or Macintosh Power PC) with access to a Cray supercomputer, UNIX hosts, departmental laser printers, a wide spectrum of software, on-line library catalogue, CD-ROM databases, Televiev, INtv and Internet.

Application forms and further information on terms and conditions of service may be obtained from:

The Director
Personnel Department
National University of Singapore
10 Kent Ridge Crescent
Singapore 119260

The Director
North America Office
National University of Singapore
55 East 59th Street
New York, N.Y. 10022
U.S.A.
Tel: (212) 751-0331

Enquiries may also be sent through **INTERNET** to: **PERCNC@NUS.SG**, or through **Telefax: (65) 7783948** . Only shortlisted candidates will be notified.

>>
>>2) NATIONAL INSTITUTE FOR DIS VERY SCIENCE IS ANNOUNCED
>>Will Study "Aerial Phenomena" an "Evolution of Consciousness"
>>

3/7/96

>>On March 2, a statement was posted on the internet concerning the newly
>>formed National Institute for Discovery Science [redacted]
>>Nevada. The statement was posted by Dr. Hal Puthoff, a scientist well known
>>for his long involvement in government sponsored research on remote
viewing,
>>and for his theoretical work on the physics of "zero point energy." The
>>statement reads as follows:
>>
>>"The National Institute for Discovery Science (NIDS) is a newly formed,
>>privately funded research organization. It focuses on scientific
exploration
>>that emphasizes emerging, novel, and sometimes unconventional observations
>>and theories. In its programs, NIDS rigorously employs accepted scientific
>>methods and maintains the highest ethical and quality standards.
>>
>>"Because NIDS is a new institution, it is too soon to determine exactly
what
>>specific projects will be undertaken. However, the Institute is
>>concentrating on exploring fundamental research on issues concerning the
>>nature and evolution of life and consciousness in the universe, and their
>>modes of interaction. A world-class science advisory board is assisting in
>>designating and reviewing specific projects. Dissemination of the products
>>of NIDS research will only occur once extensive peer review has been
>>accomplished. The means of dissemination of this information will be
through
>>publication in scientific journals and other appropriate media accepted by
>>the science community."
>>
>>The address of the institute was given as 1515 E. Tropicana, Suite 400, Las
>>Vegas, NV 89119.
>>
>>On receiving this statement, CNI News immediately sought further details
and
>>soon learned that the new institute is the brain-child of millionaire
>>businessman Robert Bigelow, who has previously funded several notable
>>research projects concerning UFOs and possible alien activity on earth. CNI
>>News editor Michael Lindemann spoke with Mr. Bigelow by phone on March 5.
>>
>>"We're trying to do the best kind of scientific research in these areas
that
>>can be done," Bigelow began. "Time will tell. Results speak louder than
>>premature talk."
>>
>>"My function, primarily, is to supply the financial resources that are
needed
>>for this kind of endeavor. Our theme is to take the best possible
scientific
>>approaches to discovery that we can, and increase the size of the
scientific
>>community that can get involved."
>>
>>Noting that the NIDS statement made no mention of UFOs, Lindemann asked
>>Bigelow if the new institute would study UFO and alien phenomena.
>>
>>"I would use the term aerial phenomena in lieu of UFO," Bigelow said. "This
>>embraces a broader spectrum of things. We're embracing more than just UFOs
>>and don't want to box our efforts into a particular presumption. I am a
very
>>strong supporter of research on aerial phenomena."
>>
>>Lindemann asked Bigelow if there were any other sources of funding for the
>>institute.

>>
>>Lindemann asked Bigelow if there were any other sources of funding for the
>>institute.
>>
>>"There certainly is not any connection to government funding or any other
>>sources like that," he said. "This is strictly private money and my own
>>money." This seems to imply that other "private money" could be involved,
but
>>Bigelow did not elaborate.
>>
>>Lindemann asked if Dr. Hal Puthoff was specifically involved in the
project,
>>and in what capacity. "Hal Puthoff is somebody we would look to for advice
or
>>consultation," Bigelow said.
>>
>>Asked to describe the institute's current stage of development, Bigelow
said,
>>"We're in a major recruitment mode right now. In fact, we have a recruiting
>>ad coming out in Science magazine this week. We're looking for top
>>scientists. We're not sure of how many yet, but we're looking for the best
>>science practitioners we can find in a lot of different disciplines, so
that
>>we can offer the institute as a resource to do investigations and research.
>>That's the whole point."
>>
>>"We're hoping that this institute can evolve into something very useful for
>>everybody," he added.
>>
>>Col. John Alexander (US Army, ret.), former head of Non-lethal Weapons
>>Research at Los Alamos National Laboratory and a man known to have strong
>>personal interest in such topics as UFOs and remote viewing, will play a
key
>>role at Bigelow's institute, although Bigelow did not specify Alexander's
>>precise position.
>>
>>"John Alexander's background is perfect to act as a liaison between the
>>institute and people in the science community," Bigelow said.
>>
>>Asked what kind of scientists Bigelow hopes to attract, he said, "We're
very
>>strict. We're looking for people that are well credentialed, have done
>>quality work and have published enough in their careers to show the
critical
>>path thinking that they employ, ...and a particular passion for studying
>>aerial phenomena [or] consciousness related to survival, and how that
>>integrates with life in the universe. I think the passion is important... I
>>think these are exciting topics, and we hope others will think so too."
>>
>>Bigelow said he realizes it could take a year or more before he has
assembled
>>enough of a team to start doing serious research. But CNI News has heard
>>rumors that some projects might already be underway. One unconfirmed story
>>suggests that the institute may have acquired an artifact thought to be of
>>alien origin.
>>
>>Though not mentioned by Bigelow, CNI News has also learned that well-known
>>Las Vegas newsman and UFO researcher George Knapp is on retainer with the
>>institute for unspecified purposes.
>>
>>Bigelow assured Lindemann during the interview that the institute intended
to
>>be open in its findings. Bigelow specifically said that he would welcome
>>further inquiries from CNI News in the future.
>>
